

Job Title: Intermediate Software Designer	Job Code: SD-301
Department: Engineering	Location: Ottawa, Canada

Position Overview

NetFore Systems is a software services company specializing in web based applications for clients in the communications, security and enterprise domains. We are seeking a talented software designer to join our expanding engineering team. The role requires participation in the full software development lifecycle, and may from time-to-time require direct engagement and on-site work with clients.

Essential Job Functions

- Working as part of a team, contribute features to customer-specific software solutions as well as productized web applications targeted at multiple customers.
- Perform detailed requirements analysis and produce functional specifications and software design documents.
- Develop effort estimates for assigned features, and be accountable for delivery within estimated and agreed schedules.
- Mentor/lead more junior designers or designers with less direct Microsoft .Net experience.
- Implement assigned features leveraging a variety of frameworks and tools in the process.
- Produce feature test cases and execute feature and integration tests.
- Collaborate with customers on pre-production testing and related activities, as well as deployment of applications to production.

Requirements

- Degree in Computer Engineering, Software Engineering or Computer Sciences
- A minimum of five years of experience as a developer (lead developer would be a plus).
- A minimum of three years of application development experience on .NET 3.5/4.0 Frameworks.
- Solid understanding of object-oriented programming.
- Significant experience designing and working with n-tier architectures (UI, Business Logic Layer, Data Access Layer) along with exposure to service-oriented architectures (SOA).
- Exceptional interpersonal skills and willingness and suitability for direct customer engagement.
- Ability to adapt quickly to an existing, complex environment.
- Ability to quickly learn new concepts and software is necessary.
- Candidate should be a self-motivated, independent, detail oriented, responsible team-player.

Skills/Abilities

- VB.NET, ASP.NET, C#
- WCF/WF
- Web Services
- jQuery, Javascript, HTML5/CSS3, WPF/XAML, XML, XSLT
- ADO.NET, SQL Server, Stored Procedures
- VisualStudio/IIS/BizTalk Server
- JEE experience is also desirable.

NOTE: This job description is not intended to be all-inclusive. Employee may perform other related duties as negotiated to meet the ongoing needs of the organization.
